****Source lane:**** briefs

Plain-English Explanation

This brief explains ARE Gyro Diode Sentinel in practical terms for a partner or buyer.

The purpose is decision support: show what the system does, what problem it reduces, and what evidence or controls make the claim reviewable.

Named Architecture

- ARE: governed recall support.
- Gyro: orientation and context stabilization.
- Diode: controlled trace or lineage boundary.
- Sentinel: policy validation and escalation.

Partner Value

- Keeps memory separate from raw model context.
- Makes important outputs easier to inspect.
- Supports review before action.
- Preserves a local artifact for human approval.

Boundaries

- No confidential source code is included.
- No patent claim over-disclosure is included.
- No hype-only claims.
- No publishing, emailing, or uploading is performed.

Review Notes

[NEEDS REVIEW] Add only verified examples, approved diagrams, and cleared terminology before external use.
